24"x24"

Thickness

1/4"

Origin

Made in the USA, By USA Employees

1/4" example

Frequently Asked Questions

What tools do I need for install?

A rubber hammer, utility knife and a T-square. If you plan to glue or tape your tiles, you will need those.

I messed up a tile. Can I replace just the one?

Absolutely! Tiles are perfect in that way. There's no need to buy a new floor. Replace as needed.

How do I know which side is up?

If you look at the center tab, the tab on the left needs to point up and the one on the right points down. As well if the tile rolls up, flip it over.
