

Our SOUNDlogix is a resilient underlayment that can be used under most floors. It comes in a variety of thicknesses.

The most popular are 2mm, 5mm, 10mm and 12mm. The 2mm has a Delta IIC of 22 and goes up from there depending on thickness.

It is a true green item made from post consumer tires. This product is designed to give your life a little more serenity.

*Soundlogix...where serenity begins*
